All films must be submitted in Digital .MP4 Film File Format (NTSC system only) for consideration. All films submitted must be available on DVD for presentation.

To ensure that your entry is properly processed, you must fill out the form completely and include proper payment.

Along with the film (Digital .MP4 Film File), press kits must include a black and white or color still of the film that is 1920x1080pxls or 1280x720pxls, a complete cast and crew list and a 250-word synopsis of the project must be included.

Films submitted must be no more violent and have no more adult content as that which would be considered as a NC-17 rated motion picture. NC-17 does not mean "obscene" or "pornographic" in the common or legal meaning of those words, and should not be construed as a negative judgment in any sense. The rating simply signals that the content is appropriate only for an adult audience. A NC-17 rating can be based on violence, sex, aberrational behavior, drug abuse or any other element that most parents would consider too strong and therefore off-limits for viewing by their children. If your film meets with this requirement, then we welcome it.

Exhibition entries should be submitted as a .MP4 File format, unless a DVD is requested. No DVDs will be returned.

Participation in the Great Lakes International Film Festival implies understanding and acceptance of all terms included in this application.

All films accepted into the 2017 Great Lakes International Film Festival will be screened online through our Virtual Theatre system.

Our festival reaches a global echelon interactively online allowing filmmakers and fans worldwide to not only enjoy the films, but communicate with each other in real time as though they were together in the same room via online chat and webcams, when available.

Our festival is presented in a video on demand system that will allow users to watch the films while remaining completely safe from download or reproduction.

Films in this festival cannot be downloaded, the films HAVE NO EMBEDDING CODE and our HTML code if copied and pasted, the films will not play, and therefore they CANNOT be placed on other websites. The only time and place they can be viewed is in our festival. In short, we have gone to great lengths to set this system up to protect the safety and security of each filmmaker's film always keeping the filmmaker in mind. Basically, it is just as secure as a brick and mortar theater screening, only much better.

You hear so much about the environment and global warming it got us thinking. When you realize how much power is used during the film fest – electricity for the building, natural gas for heat and the gasoline the people use to get to the fest it left one hell of a carbon footprint. By doing the whole festival online it actually helps cut down on greenhouse gases.
